

The Ferno Hardpoint provides all the comfort and safety features of the Centrepoint II with a front hard point connection.

New industry-leading features include innovative, lightweight and breathable back, shoulder, waist and leg padding providing unparalleled support and comfort. Reflective webbing and padding provides pronounced visibility for greater safety while working at night or in dark conditions. These features make the Hardpoint harness an excellent choice for rescue and rope access technicians or professionals who demand comfort and freedom of movement when suspended for long periods..
